

## An engineer working for an insurance company? – Absolutely

Risk engineers are critical to the success of our company. In short, they help our underwriters analyze, evaluate, and price our customers' risks. Our Risk Engineers also work with customers to help them identify hazards and provide sound loss control advice to help customers mitigate the impact of the hazards.

Risk Engineers contribute not only to Zurich's success, but also to that of our broad customer base, which includes many Fortune 100 companies. Our risk engineers don't have a typical "desk" job. They work remotely, traveling to customer locations in their area to perform assessment visits and work with customers in a wide array of industries including manufacturing, hospitality, healthcare, construction and more.

Zurich's Risk Engineering Training Program will start you on an exciting and challenging career path that allows you to capitalize on your technical education as part of a global insurance leader. The program is a six-month hands-on training program:

- Two week classroom training in Schaumburg, IL
- Structured on-the-job training at your hiring office
- Mentoring and technical support from experienced Risk Engineering professionals

### As a Zurich Risk Engineer, you will have an opportunity to:

- Work in a fast-paced but flexible environment
- Meet with customers in a variety of industries
- Be a key contributor to the success of Zurich Financial Services
- Think and act on your feet, not simply at an anonymous desk

**Become a  
Zurich  
Risk Engineer!**

## Who are we are looking for?

- BA or BS in Fire Protection, Chemical, Civil, Mechanical, Electrical, Industrial Engineering or equivalent program
- Valid driver's license and acceptable driving record
- Eligible to work in the US
- High level of computer literacy
- Strong technical writing and verbal communications skills
- Desire to work directly with customers at their facilities and not in a conventional office environment
- Able to work independently and as part of a high performance team
- Ability to influence others in order to have specific impact
- Able to make good decisions based on evaluation and analysis
- Motivated to be successful and willingness to support lifelong learning
- Flexible to perform in various environments
- Proficient in Microsoft Office

## A global approach to Risk Engineering

At Zurich, we customize our service to address specific customer needs, and work closely with customers and brokers to design a focused approach that concentrates efforts on issues having the greatest impact. Each local Risk Engineer is trained to apply our global standards. This helps ensure quality, consistency and customer satisfaction.

Risk engineering services play a key role in helping businesses manage total cost of risk. We seek first to fully understand our customers' business needs and culture before proposing a risk improvement strategy.

Our global network of over 1,000 risk engineering professionals—thought leaders in the industries they serve—work to identify areas where most impact can be achieved and then focus on quantifiable results. Whether a customer operates from a single location or an international enterprise, our risk engineers help customers manage their risk and protect the bottom line.

## Who is Zurich?

Zurich Insurance Group (Zurich) is a leading multi-line insurance provider with a global network of subsidiaries and offices in Europe, North America, Latin America, Asia-Pacific and the Middle East as well as other markets. It offers a wide range of general insurance and life insurance products and services for individuals, small businesses, mid-sized and large companies as well as multinational corporations. Zurich employs about 60,000 people serving customers in more than 170 countries. The Group, formerly known as Zurich Financial Services Group, is headquartered in Zurich, Switzerland, where it was founded in 1872. Further information about Zurich is available at [www.zurich.com](http://www.zurich.com).

In North America, Zurich is a leading commercial property-casualty insurance provider serving the global corporate, large corporate, middle market, specialties and programs sectors. Life insurance offered in the United States is issued by Zurich American Life Insurance Company, an Illinois domestic life insurance company. For more information about the products and services it offers and people Zurich employs around the world, go to <http://www.zurichna.com/zna/aboutzurich/zna-home.htm>. Zurich celebrated its 100 year anniversary of insuring America and the success of its customers, shareholders and employees in 2012. Further information about Zurich's 100 year anniversary of insuring America is available at <http://www.zurichna.com/100>.

**Competitive salary and benefits**

**Locations across the US in growing markets**

**A career that makes a difference**

**Continuing career development opportunities from the best in the industry**

If you are intrigued by these possibilities, then the Zurich Risk Engineering Training Program may be for you. We are looking for graduates with technical degrees and a desire to engage customers at their sites. Do you like working independently, traveling, meeting new people, and building relationships? If this is the kind of challenge that excites you, we want to hear from you!
